

## The Fabric of Wishes

*is rolling out in your neighborhood !*

The idea is to **locally** create a **person-empowering economy** based on **mutual assistance and recognition** — thanks :

- firstly, to "**wishing circles**", which are regular meetings where people who like such practices are invited, in turn, to present themselves and state what they have to **offer** in the network, their **needs** — as well as those of their **projects or businesses** —, their **interests**, location, availability, itineraries, messages, etc.

If **debates** arise that may take time to resolve, the deliberation will be **postponed** to a time other than that reserved for everyone's wishes, so that each person present can have their turn to speak and to be listened to attentively. — Also, since human memory is imperfect, bringing what is necessary to take notes is definitely a good idea.

**At the end of this talking circle**, when everyone has had their turn, we will have the opportunity to **meet** and chat more **informally**. If it's nice enough outside, the meeting can turn into a **picnic** with a "**potluck**" section to share ; we can **jam**, dance, play, hang out . . .

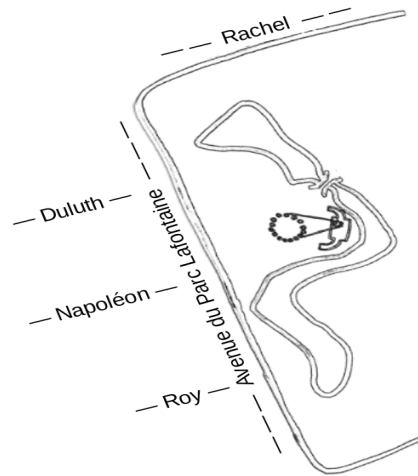

Often, for having a **conversation** and **ideas**, and then soon a **project**, it is often enough to simply **meet** someone or a small group of people who have ideas ; exchange a few words — **and a whole world together to co-create !**

You are free to **arrive early** ; it can also be a good time to make friends with other weavers of doable dreams, perhaps also jam in the park while waiting if the weather is nice.

~ EVERY ~ SATURDAY ~

~ Around 2 p.m. : start of the circle ~

Look out for our billboard ! 

*In cold or rainy weather, we can find a corner  
(we asked)*

*at the **Robin des Bois** chalet.*

*Otherwise we'll meet in the park in front !*

- A second tool will be available for those who choose to use it : the **recognition booklet**, designed to keep decentralized inter-individual accounting allowing one to learn about one's "give Vs. receive" **balance** within the community, and thus to make exchanges more fluid. All recognition booklets start with a balance of **zero HOP** — the HOP being a unit of exchange corresponding (indicatively) to one **hour** of

work by a **person** — and it is expected that the balance of each booklet oscillates, over a year, **around zero**.

The vitality of a community is measured by the **quantity** and **quality** of its **exchanges** and **sharings**, not by the sum of its bank accounts ! Moreover, the total sum of the balances (in HOPs) of all the recognition booklets is always : **zero**.

**Booklets can also be kept for our various businesses** — which it will be up to the community to support as it sees fit with its (our) time, donations, or even "**encouragements**", in HOPs or other currencies.

It is up to the **collectivity** (i.e. each and every one of us) to **take care** of itself, to **encourage** itself, to **participate** in its wonderful undertakings, while taking advantage, of course, of the famous **collective intelligence !**

We could, to this end, **at each turn of the season**, reflect together on our **collective needs**, on what works well, what works less well, as well as on our **visions for the future**. — And finish it all off with a big feast, *of course !*

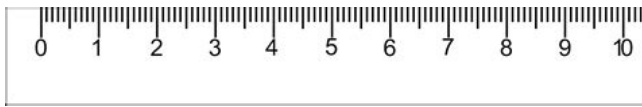

**The Fabric of Wishes** is intended to be easily reproducible in all localities, all neighborhoods where people want to *weave* their world together.

**Consult out toolbox !**

**LaTramice.net/The-Fabric-of-Wishes**

Money, which *should* be a simple *measuring instrument*, on the contrary artificially creates **disparity** in the form of **excess** and **scarcity**. However, it would be **absurd** to **lack** centimeters to be able to take all the measurements we would like to take during the day, right ?

The HOP is designed as a **real measuring instrument** ; not for its *precision* (the measurement is indicative, subjective and subject to negotiation), but for its **conviviality**. An hour of tiring or difficult work, for example, could be counted as 2 or 3 HOPs, or even more. Also, certain things, even if not necessary, are sometimes nevertheless truly invaluable.

**Another aspect** : the HOP being a unit of measurement, capable of going *below zero*, it would be **absurd to use it as a good that can be lent or borrowed** — and catastrophic to make it into something that can be rented !

The fact that this **unit of exchange** is associated with *The Fabric of Wishes*, a **network of networks** of people who take the time to **meet** (and *network further* ! ) ; the fact that it is **transparent** and therefore **cross-verifiable** by **peers** ; the fact that it is an **individual tool**, which does not depend on a central body, nor on variable *exchange rates*, but on a **universal : time** — all this contributes to its **reliability** and its **usefulness**, and therefore to the **confidence** we can have in it.

Starting June 29th 2024

## WEEKLY GATHERING

~ EVERY Saturday at 2 PM ~

we will form a **circle**   
to **listen** to each of us, one after the other,  
share our :

**Wants • Talents • Offers • Interests**  
and those of our **Projects**

(let's keep our sharing short and concise,  
so that all may get a chance to participate)

After our circle, there will be time to **network**  
and exchange contact information.

**Meeting Place :**

 **The Grassy Field in Front of** 

The Chalet ***Le Robin des Bois***  
(just beside the little bridge at Parc Lafontaine)

~ OR ~

~ **Inside the Chalet** ~  
(depending on weather)

bring food, blankets, **games**,  
things to barter — *and musical instruments*  
*for having jam after the gathering.*
